Why do homeowners regret installing solar panels?

Low-quality or poor-standard panels may cause more problems than they solve. Solar panel manufacturers often promise high output levels for their products. However, if these promises aren't met due to inferior materials or manufacturing processes, it's easy to see why homeowners regret installing solar.

Do you regret buying solar?

Honestly you cannot regret when it comes to Solar because at the time you were ready to buy, you buy what ever you can afford at the time. Solar has improved so much over the years and not to mention price has come down since the old FIT were 50cents a day. Garry writes... Anyone with a large system that joined with a pFIT will have no regrets

What are some common problems after buying solar panels?

Common Regrets After Purchasing Solar Panels, is something many homeowners share after making hasty decisions or failing to consider all factors involved with going solar. From choosing poor-quality panels, underestimating maintenance costs, ignoring local utility rules to not understanding tax breaks fully can all lead down this path.

Do you regret installing a large PV system?

Anyone with a large system that joined with a pFIT will have no regrets Very rare for people who qualified for PFIT to have installed a large system. Most were 1-3 kW, with the odd 5 kW. PV was way more expensive back then and panel efficiency much lower (more real estate per W).

I bought an Ecoflow Delta Pro in Feb of 2023, and kinda of regret it now that I've learned more about Solar . My biggest regret, other than cost, is if one part of it goes bad, you may have to ...
