Why do homeowners regret installing solar panels?

Low-quality or poor-standard panels may cause more problems than they solve. Solar panel manufacturers often promise high output levels for their products. However, if these promises aren't met due to inferior materials or manufacturing processes, it's easy to see why homeowners regret installing solar.

What are some common problems after buying solar panels?

Common Regrets After Purchasing Solar Panels, is something many homeowners share after making hasty decisions or failing to consider all factors involved with going solar. From choosing poor-quality panels, underestimating maintenance costs, ignoring local utility rules to not understanding tax breaks fully can all lead down this path.

Can solar panels rain on a solar parade?

Solar panel installation might seem like a breeze, but there are common challenges that can rain on your solar parade. One such challenge is the positioning of the panels for optimal sunlight coverage. Installing solar panels isn't just about slapping them onto your roof anywhere you please.

Do solar panels deteriorate a lot?

Let me share an intriguing statistic with you. Solar panels experience an annual degradation rate of 0.5%. This means that each year, your panel's capacity to produce electricity reduces by half a percent.

This could be dirty panels and all panels are under producing or this could be a subset of panels aren't working at all for some reason (never hooked up right, a breaker off/tripped, or ...
