Who can sign a solar PV plan in California?

PV plans may be stamped and signed by a California registered Civil or Electrical Engineer or a licensed Electrical Contractor (C-10 License), General Contractor (B License) or Solar Contractor (C-46 License) who is responsible for the design and installation of the system.

How do I get a photovoltaic - SB 379 permit?

Panel upgrade up to 320 amps. An energy storage system up to 38.4 kWh with each unit no greater than 20 kWh. Inverter-integrated electric vehicle charger. Submit these projects electronically through the online portal, selecting the Photovoltaic - SB 379 Permit.

When will San Diego Gas & Electric (SDG&E) be notified?

After receiving final inspection approval for all related City of San Diego Permits, San Diego Gas and Electric (SDG&E) will be notified. The system is not approved to energize until SDG&E approval is obtained.

Do I need a building permit for a PV system?

An Electrical Permit is required for the installation of PV systems and photovoltaic shingle systems. A Combination Building Permit is required if the scope of work includes structural modifications to existing single-family/duplex/townhouse residential structures to support the PV system or photovoltaic shingles.
