How did solar panel imports perform in the second quarter of 2024?

In the second quarter of 2024, the U.S. saw an unprecedented surge in solar panel imports, setting a new record as shipments flooded into the country. According to S&P Global Market Intelligence's Global Trade Analytics Suite, U.S. imports reached 17.4 GW. This marks a 36% increase from the same period in 2023.

How did US solar panel imports perform in the first three months?

Source: jgroup/iStock/Getty Images Plus via Getty Images. US solar panel imports remained robust in the first three months of 2024, coming in just short of the prior quarter's record 15 GW and notching a 13.8% gain from a year ago, according to the S&P Global Market Intelligence Global Trade Analytics Suite.

How many solar panels will Vietnam import in 2024?

As the waiver approached its expiration in June 2024, manufacturers and developers hurried to import as many panels as possible. They do so as they're anticipating potential new tariffs. Vietnam led the charge, shipping about 7.3 GW of solar panels to the U.S. in the second quarter.

Who are the major solar importers?

Major importers during this period included affiliates of China-based Trina Solar Co. Ltd. and Arizona's First Solar Inc. Amid this surge, the U.S. solar industry is witnessing a wave of new domestic factories, spurred by Biden's Inflation Reduction Act of 2022, which are now competing for a share of the growing market.
