What does a solar energy fund invest in?

In addition to renewable energy producers and enablers, the fund invests in energy efficiency and management, exemplified by third-largest holding ON Semiconductor ON (7.3% of assets), and in EVs, with Tesla TSLA (6.4%), which ranks fourth.

Who is NextEnergy Solar Fund?

NextEnergy Solar Fund ("NESF") is a leading specialist solar energy and energy storage investment company that is listed on the main market of the London Stock Exchange. NextEnergy Solar Fund invests primarily in utility scale solar assets, alongside complementary ancillary technologies, like energy storage.

What types of funding programs are available for solar energy projects?

Funding programs encompass at least one research area: photovoltaics (PV), concentrating solar-thermal power (CSP), systems integration (SI), soft costs (SC), manufacturing and competitiveness (M&C), and solar workforce development (WF). For a list of individual projects, view our Solar Energy Resource Database.

How many wind energy companies does a wind energy fund hold?

It holds two types of wind energy companies: Pure-play companies that get at least 50% of their revenue from wind-related activities (60% of the fund). Diversified companies that have some involvement in the wind industry (40% of the fund). This fund had about 45 holdings in late 2025, led by the following five:
