What is a solar generator & portable power station?

Today, solar generators and portable power stations are go-to mobile juice solutions for van-lifers and campers, temporary off-grid worksites, travel photographers and drone operators, and at-home backup power for when the lights go out.

What is the best solar power generator for camping?

Say you need a solar power generator for a few days of camping, over the course of which you're hoping to power a few small devices, a string of lights, and maybe even a small electric cooler--the Anker Solix C800 Plus is the perfect little unit. About the size of a shoebox and just 24 pounds, it's as portable and compact as can be.

Can a portable solar generator store a lot of power?

A portable solar generator comes in an extremely wide range of sizes, but a generator's size doesn't automatically make it capable of storing a lot of power. In fact, most are disappointingly limited and unable to store much more juice than a portable charger.

What makes a good solar generator?

Solar generators need to keep the power coming in and going out. The best solar generators can simultaneously charge all your intended devices via whatever plugs are necessary. Any portable power station worth your money will have a high output capacity so you can charge many devices, even if they require a lot of juice.

We rated and reviewed the best solar-powered generators for home backup during power outages, including models from Generac, Jackery, and more.
