The Solar Roadmap details government and industry actions that will be delivered to radically increase the deployment of solar in all its forms across the UK.

Solar offers huge potential to boost our energy independence, bring down bills and tackle the climate crisis. It also presents a significant economy and industrial opportunity. We estimate that...

This new Solar Roadmap is part of the UK's push to cut carbon emissions, improve energy security, and reduce electricity bills. As solar energy becomes cheaper and more efficient, the ...

The UK government has published a new "Solar Roadmap" policy paper setting out how it plans to achieve 45-47 GW of deployed solar capacity by 2030, from nearly 19 GW as of May 2025.

Solar energy is among the lowest cost, and most popular, forms of power generation in the UK, and unlocking its potential will increase Britain's energy security, drive down bills as well...

The energy policy of the United Kingdom refers to the United Kingdom's efforts towards reducing energy intensity, reducing energy poverty, and maintaining energy supply reliability.

Summary  
Primary energy sources of electricity supply  
Overview  
Net Zero strategy since 2021  
Energy markets  
Energy end usage  
Energy market policy history  
Energy supply and decarbonisation policy history  
The UK's electricity demand stabilised in 2017, with consumption reaching 307.9 terawatt-hours (TWh), marking a 12% decrease from 2007. Consumption was evenly distributed among the residential, commercial, and industrial sectors, with each accounting for roughly one-third. The industrial sector experienced a significant reduction of 18% in consumption, dropping from 113 TWh in 2007 to 93 TWh in 2017...

The Solar Roadmap, produced through collaboration with industry, presents a comprehensive strategy and clear plan of action to achieve the significant increase in solar deployment needed to support the ...

## Solar energy policy united kingdom

The Solar Roadmap is a new policy paper setting out the practical steps that the Government and industry are expected to take to deliver on the Government's ambitions to achieve ...

The UK government has published a new Solar Roadmap, outlining more than 70 actions aimed at accelerating solar deployment to meet national energy and climate targets.

What Is the UK Solar Roadmap 2025? The UK Government has published its long-awaited Solar Roadmap 2025, outlining how it plans to increase solar capacity to 45-47 GW by ...
