---

Start of the solar territorial characterization of northern Chile, which has made it possible to obtain key information to know the spectral irradiance and to specify the estimates of ideal energy generation ...

Solar Energy Research Center is located in Santiago, Region Metropolitana, Chile. Solar Energy Research Center conducts research and development in solar energy, focusing on technology, ...

The challenge of this center is to turn Chile into a solar country. The project is based on the fact that Northern Chile -"Norte Grande" - offers great potential for producing electric power, heat and light ...

On April 3, 2025, Fraunhofer Chile celebrated the 10th anniversary of its Center for Solar Energy Technologies (CSET) with a festive event. The research center supports the development of a ...

We want to help develop reliable and optimized components for Concentrated Solar Power (CSP) and Solar Photovoltaic (PV) power generation in Chile and support the installation and successful ...

Its main objective is to become a world leading institution on solar energy research, focusing primarily on developing the energy potential of the Atacama Desert in Chile.

Solar Energy Research Center, SERC Chile, naci#243; el a#241;o 2012 con el desaf#237;o de convertirse en un li#243;der mundial en investigaci#243;n cienti#243;fica sobre Energi#243;a Solar, con especial e#243;nfasis en desarrollar el ...

El Norte Grande chileno presenta un gran potencial para la producci#243;n de electricidad y calor sobre la base de energ#237;a solar y para la aplicaci#243;n de soluciones tanto fotovoltaicas como t#233;rmicas, dados, ...

The overall aim of SERC Chile is to build a solid base of knowledge on solar energy. For this second stage

# Solar energy research and development santiago

(2017-2022), four strategic focuses were defined for the development of solar energy in Chile:
