-----  
How do solar panels for swimming pools work?

Here's how it works. Solar panels for swimming pools is a combination that makes sense, especially if you're heating a pool that you mainly use during the summer. With daylight in greater abundance during this time, using renewable energy can help cut the expensive costs of heating the water.

Can solar panels heat a pool?

As long as the solar panels are receiving solar irradiation, they will be converting solar power into heat. When solar heating your pool, you will be helping the environment and saving money by not using the energy from an electric heating system.
