-----

Cemex and Synhelion announced today a significant milestone in their joint effort to develop fully solar-driven cement production: the scaling of their technology to industrially-viable levels.

Cemex and Synhelion report prospective scaling of a high-temperature process to industrially-viable levels, where solar energy supplants fossil fuel combustion. This marks a ...

CEMEX and Synhelion have announced a significant milestone to develop fully solar-driven cement production by scaling their technology to industrially-viable levels. This includes the ...

Two construction companies, Synhelion and Cemex, have embarked on a groundbreaking collaboration to revolutionize cement production by harnessing the sun's power, one of the most energy-intensive ...

This article highlights the groundbreaking initiative by Holcim, a cement manufacturer, to generate 75% of its onsite power with a 25 MW solar array. This move is a testament to the potential ...

Cemex and Synhelion are on their way toward achieving a fully solar-powered cement production with the latest scaling of their technology to industrially-viable levels.

By integrating renewable energy sources such as solar and wind power, cement manufacturers can effectively reduce their energy costs while simultaneously decreasing their carbon ...

Cemex expects the use of solar generated power at the Clinchfield Cement Plant to offset about 10,000 metric tons of indirect CO2 emissions per year, accelerating Cemex's 2030 Scope 2 goal of reducing ...

Green, carbon-free, sustainable solar energy solutions for cement factories to help build the planet's future. Throughout history and until the present period of unceasing progress, buildings and ...
