-----

Obscured by the recent rush to sign up households for rooftop solar and speed up the electrification of America are those who already have solar panels on their roof that do not work.

Though solar represented just 3.4% of the nation's electricity generation in 2022, studies show that rooftop solar could eventually meet residential electricity demand in many states if deployed widely, ...

With money no longer cheap, subsidies a matter of politics and swirling allegations of fraud, a collapse could be coming soon.

Meanwhile, my solar panels have been sitting on my roof for four months, entirely unused, taunting me from above. Over another summer of record-breaking heat, my electricity bills ...

Explore the challenges facing rooftop solar lately, from financial struggles to policy changes, and what the future holds for residential solar. FranklinWH has the insights.

Residential solar installations declined 31% in 2024. Over the last year, industry titans like SunPower, Sunnova, and Mosaic Solar have filed for bankruptcy.

Meanwhile, my solar panels have been sitting on my roof for four ...

The risk of damage to buildings with roof-mounted solar panels is simply higher due to the presence of the panels. Insurers may unknowingly bear a considerable portion of this risk, and the ...

Let's get one thing clear: While the solar industry isn't collapsing, it isn't at its peak. "It definitely is a tough time for the residential solar market," Gaston said.

In late 2023 alone, more than 100 residential solar dealers and installers in the U.S. declared bankruptcy, according to Roth Capital Partners -- six times the number in the previous ...
