Sweden's first and one of the world's largest facilities for capturing and storing carbon dioxide will be built in Energihamnen near V&#228;rtaverket in Stockholm. This has been decided by the ...

Stockholm Exergi has announced that it is to build one of the world's largest facilities for capture and permanent storage of biogenic carbon dioxide. The investment decision marks a major ...

The Beccs Stockholm project will create a world-class, full-scale Bio-Energy Carbon Capture and Storage (BECCS) facility at its existing heat and power biomass plant in Stockholm.

BECCS Stockholm is a large-scale Bioenergy Carbon Capture and Storage (BECCS) facility that Stockholm Exergi is building, integrated with the biopower plant in V&#228;rtan, Stockholm.

Located in the Energy Port in V&#228;rtaverket, Sweden the project, known as Beccs Stockholm, will be Sweden's first large-scale bioenergy plant with carbon capture and storage (CCS). ...

The facility will be built in the energy port nearby V&#228;rtaverket in Stockholm. Once completed, it will capture and permanently store 800,000 tonnes of CO<sub>2</sub> annually--more than the ...

Stockholm Exergi has initiated work to build a full-scale bio-CCS (Bio-Energy with Carbon Capture and Storage, BECCS) facility at the V&#228;rtan combined heat and power plant in Hjorthagen.

The BECCS facility will be built in the Energy Port near V&#228;rtaverket in Stockholm. When completed, it will capture and permanently store 800,000 tonnes of biogenic carbon dioxide (bioCO<sub>2</sub> ...
