Based on international experience and an understanding of the overall situation in the Northeast region and China, we have conducted a retrospective analysis of peak load winter demand and power ...

Our R& D, production, quality control, and marketing departments have progressively established scientific and rigorous systems and processes, dedicating full efforts to creating high-quality Made-in ...

In addition, the annual and seasonal photovoltaic power of China is calculated, and the spatial distribution of China's solar resource utilization potential is obtained using the calculated ...

To meet China's goal of carbon neutrality by 2060, substantial investment in upgrading power systems needs to be made to optimize the deployment of new photovoltaic and wind power ...

The main technical performance of Sunlight Room includes thermal insulation performance, ventilation performance, and power generation performance combined of solar panels.

An aerial view of the construction site of a 1-million-kilowatt solar-thermal energy-generation and storage project in ...

PV sunrooms adopt double-glass bifacial PV modules (with solar cells protected between two glass layers). This structure has existed for nearly a decade and now features mature technology and ...

In the past 3 years, with the rapid development of the photovoltaic industry, we exported complete solar systems involving home storage power and commercial ...

The results show that currently the photovoltaic power generation technology is relatively mature and widely applied, and passive photovoltaic ...

Sunroom with solar power generation in Northeast China

Recently, we completed an innovative photovoltaic system in a sunroom project, providing power for lighting, air conditioning, and various small household ...
