Each SolaraBox container is engineered by a certified R& D team with expertise in solar energy, electrical integration, and structural design. Our systems comply with standards for PV modules and ...

Becoming climate neutral requires a series of measures to reduce carbon footprint, and the more efficient and cleaner energy consumption is a major one. A shift.

Sunplus latest EV Charging Station product line offers a range of innovative solutions to meet diverse charging needs.

MOBIPOWER hybrid clean power containers combine battery energy storage systems with off-grid solar containers for remote industrial sites in Canada & USA.

The research project "Bidirectional Charging Management" (BCM) tests bidirectional charging applications in a comprehensive field trial to demonstrate the customer benefits and value ...

Hager Group develops and markets innovative solutions that allow electric vehicles to be used as storage for excess solar energy and feed this energy back into the home or public grid as ...

BoxPower's hybrid microgrid technology combines solar, battery, and backup power into a modular platform designed for remote and resilient energy.

Discover our range of innovative solar panels on shipping container products engineered to meet your renewable energy needs with maximum efficiency and reliability.

Each unit is 100% solar-powered with battery backup, requiring no fuel, generator, or grid connection--ensuring uninterrupted, dependable operation in any environment.

Supplier of bidirectional solar-powered container charging for field research

We are proud to partner with one of the leading providers of factory installed solar options for shipping containers. Learn more about the product and inquire below.
