The average price of lithium-ion battery packs stands at \$152 per kilowatt-hour (kWh), reflecting a 7% increase since 2021. This rise, albeit slight from 2022's \$151/kWh, underscores the ongoing ...

In 2025, the typical cost of commercial lithium battery energy storage systems, including the battery, battery management system (BMS), inverter (PCS), and installation, ranges from \$280 to ...

In recent years, the price per kWh battery storage has seen a significant decline due to improvements in energy density and more efficient manufacturing processes.

New York - December 9, 2025 - According to BloombergNEF's 2025 Lithium-Ion Battery Price Survey, average pack prices have fallen to a record low of \$108 per kilowatt-hour, marking an 8% decline ...

Historical prices adjusted by the source to reflect real 2025 U.S. dollars. Volume-weighted average price including 320 data points for passenger cars, buses, commercial vehicles,...

New York, December 9, 2025 - lithium-ion battery pack prices have dropped 8% since 2024 to a record low of \$108 per kilowatt-hour, according to latest analysis by research provider BloombergNEF (BNEF).

The cost of battery storage per kWh ranges from \$700 to \$1,300 installed for residential systems and \$125 to \$334 for utility-scale projects as of late 2025. Battery pack prices alone have ...

In 2025, lithium-ion battery pack prices hit a record low of \$108/kWh across all segments, with stationary storage systems plummeting to \$70/kWh--a staggering 45% drop from 2024 levels.

Costs vary widely based on size and battery chemistry, generally \$500-\$1,000 per kWh installed. Additional benefits include demand charge management, energy cost reduction, and ...

The cost of lithium battery energy storage per kilowatt-hour

In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration systems. The projections are developed from an ...
