We have put together a comprehensive history of the development of solar power. View our infographic timeline including key inventors and important milestones

Many argue that this event marks the true invention of PV technology because it was the first instance of solar technology that could actually power an electric device for several hours of a day.

Often hailed as the father of solar power, Fritts made history in 1883 by creating the world's first solar panel. This ground-breaking invention laid the foundation for the solar technology that powers our ...

In his research, Hertz discovered that more power was created by ultraviolet light than visible light. Today, solar cells use the photoelectric effect to convert sunlight into power.

A satellite carrying large solar panels would use a laser to transmit the power to an airship at an altitude of about 12 miles, which would then transmit the power to Earth.

At the young age of 19, working in his father's lab, Becquerel discovered the photovoltaic effect. He observed that shining light on certain materials generated electricity. This groundbreaking ...

The Bell Labs Demonstration Solar Module is a historical artifact representing a significant milestone in solar energy development. It was likely created in 1955...

We have put together a comprehensive history of the development of solar power. View our infographic timeline including key inventors and ...

This new solar cell was publicly demonstrated on April 25, 1954. This development is a landmark in the history of solar energy, widely considered the birth of the modern solar panel and ...

The invention of solar panel power generation artifact

Discover the fascinating 180-year history of solar panel invention and the broader history of solar energy, from Edmond Becquerel's 1839 discovery to Bell Labs' breakthrough and today's ...

Before the first modern solar panels were invented by Bell Laboratories in 1954, the history of solar energy was one of fits and starts, driven by individual inventors and scientists.
