Chart: Which 10 countries generated the most solar power in 2023? China was the top solar power producer last year, but it's not the only nation that saw a big leap in solar production.

Explore the Top 10 Solar Energy Producing Countries of 2025. See who leads the clean-energy race. Read the full list now!

Top 10 nations with the most solar power installed in 2023 By the end of 2023, 3,869,705 MW of renewable energy were generated worldwide, of which 1,418,969 MW, or 36.67%, were ...

This list of the Top 10 Solar Power Countries in the world is based on their total solar power capacity in gigawatts (GW) as of 2024. It shows how each country is using sunlight to power ...

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the highest percentage of their electricity from solar power.

Solar power generation, 2025 Electricity generation from solar, measured in terawatt-hours.

China, the US, and India dominate solar power in 2025, producing most of the world's clean electricity from sunlight. These ten nations collectively account for more than two-thirds of ...

This dashboard ranks countries/areas to their renewable energy power capacity or electricity generation. The data can be further refined based on region, technology or year of interest.

Here are the top 10 PV generating countries exploring their solar capacity and growth prospects. China - 584 TWh. China leads the global photovoltaic revolution, producing 584 terawatt ...

In this article, we will discuss the list of the top 10 largest solar energy-producing countries along with their production, the largest solar power plants, and how government ...
