Discover the evolving policies and regulations of the European Union and United Kingdom, with both issuing landmark legislation in the energy storage.

The joint government and Ofgem Technical Decision Document confirms details of the Long Duration Electricity Storage (LDES) cap and floor scheme and how it will operate.

Providing a regulatory definition of energy storage will not only confirm that it should be treated as a generating asset, but will also help to cement energy storage as an integral part of the electricity system (Ofgem, 2020).

Great Britain currently has 2.8 GW of LDES across 4 existing pumped storage hydro schemes in Scotland and Wales, which already play a significant role in powering the country.

We have set out below the key takeaways from the TDD (along with elements that remain unchanged from the Response), along with key dates and next steps to note for prospective ...

In the fourth in our series of briefings following the passing of the Energy Act 2023 (the Act) on 26 October 2023, our energy experts at Norton Rose Fulbright look at the implications of the Act on ...

In the fourth in our series of briefings following the passing of the Energy Act 2023 (the Act) on 26 October 2023, our energy experts at Norton Rose Fulbright look at the implications of the Act on regulation of the electricity ...

Energy Act 2023 is up to date with all changes known to be in force on or before 11 December 2025. There are changes that may be brought into force at a future date. Changes that have been made...

We are developing the licence that companies will need to work in long duration electricity storage. We set a

United kingdom energy storage regulations

minimum and a maximum for how much a company can earn from an LDES project using a...
