What is a foldable container?

Such foldable containers are compatible with the normal ISO-approved TEU or FEU and are strong enough to be placed anywhere on a shipboard stack. Any number of containers from 2 to 5, can be folded and stacked in such a way to form a regular container size for transport or storage.

Which companies are coming out with foldable containers?

Staxxon is another company that is coming out with foldable containers. This year, the US-based company operating out of New Jersey began trials of their foldable containers collaborating with freight vessels, road transport operators, and railcar companies.

When did foldable shipping containers come to light?

Business establishments and freight and transport operators got so used to rigid shipping box containers that foldable containers never came to light until about 2008. Imagine flat-packing your empty shipping containers and stacking them when not in use or during transportation.

How long does it take to fold a container?

Folding and unfolding of such containers take only ten minutes and four folded containers are connected or 'bundled' together to form a single unit. These bundled single units are then handled like a single container using normal MHE.

Enter The Foldable Container How Does A Foldable Container Work? The Downside of Foldable Containers While the containers from HCI are of the collapsible type, those from Staxxon fold vertically, in the company's words "accordion style". To fold an HCI container, an MHE would lift the roof of the container, and then the sides are folded inward. The roof is then lowered gently to rest on the folded sides creating a kind of horizontal flat-pack.
