In a significant development, Vietnam Electricity (EVN) has secured approval for its first pilot BESS project with a capacity of 50 MW/50MWh.

Against this background, this article examines the key drivers underpinning Vietnam's energy storage market demand and provides an outlook on its future development.

With the rapid growth of renewable energy in recent years, industry experts are urging Vietnam to increase the use of battery energy storage systems (BESS) within its national power grid.

Vietnam is accelerating efforts to develop a large-scale battery storage market, aiming to strengthen its renewable energy transition. On September 12, Hanoi hosted a regional roundtable on ...

The workshop aims to promote the harmonization of national standards with international practices, while also strengthening Viet Nam's capacity in the development, testing, and certification ...

Subsidiary of Japanese conglomerate Marubeni has brought online a megawatt-scale battery storage demonstration project in Vietnam.

Vietnam is one of the first three countries selected for a pilot program under a new partnership initiative between the Asian Development Bank (ADB) and the Global Energy Alliance for ...

Vietnam began implementing BESS systems from 2019. However, due to the lack of a complete set of policies and regulations for BESS development, most BESS systems in Vietnam are after-the-meter ...

Vietnam just set the rules of the road for grid-scale batteries Battery energy storage systems (BESS) have become foundational infrastructure in liberalized electricity markets. In Texas, ...

Vietnam large-capacity energy storage battery

Experts agreed that battery storage would play a transformative role in Vietnam's energy transition. Bình said the 2026-2030 period would be crucial for deployment, especially now ...
