---

A six-megawatt ground mounted solar power plant, which powers the village of Modhera, is constructed on common grazing land, and has also restricted people's access to their farms on the ...

Over the next decades, solar energy power generation is anticipated to gain popularity because of the current energy and climate problems and ultimately become a crucial part of urban infrastructure.

Located 50 kilometres away from the Anantagiri mandal headquarters in dense forests of the ASR district, Gudem had for decades remained virtually cut off from the modern world. Villagers...

Campaigners opposed to a 2,500-acre solar farm said they were "shell-shocked" after the plan was approved by the secretary of state for energy. Sunnica's 600m energy farm on the...

Villagers fighting to stop one of the UK's biggest solar farms being built say it will "destroy" and "industrialise" the countryside.

Worried villagers say their "rural paradise" is being destroyed by Britain's green energy rollout after plans for a vast, nearby solar farm were approved.

Most developed countries have stopped building nuclear reactors, despite them being reliable zero-emissions power generation facilities. Innovation in nuclear power has ground to a halt.

Residents of Anakyayla which is a Kurdish-majority village in Turkey's Bitlis Province, have successfully halted a solar energy project, citing ecological concerns and displacement risks, ...
