Designed for off-grid mobility, these containers use solar energy to power electronics, communication systems, and lighting, making them ideal for temporary or remote operations.

This is the weather system we use at Stella Porta's Farm, It is a self-contained, cloudless weather station built around the Ecowitt WS90, an RTL SDR, and a Raspberry Pi.

A solar-powered weather station is an advanced environmental monitoring system that harnesses solar energy to operate sensors and transmit data. These stations are designed to measure ...

This is the product of combining collapsible solar panels with a reinforced shipping container to provide a mobile solar power system for off-grid or remote locations.

This could power a tiny home or other small off-grid setup like a hunting cabin. For me though, I'll start with just keeping my electric tractors and ...

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks ...

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

Explore the advancements in solar-powered weather stations, which provide reliable meteorological data collection while operating independently of the electrical grid.

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

Weather station uses off-grid solar-powered container 40 feet

We are offering mini renewable power stations in a Off-Grid shipping Container ready to be deployed worldwide. These include solar PV panels and mountings.
