How many MW of new battery storage capacity does Greece have?

The Greek authorities have awarded 300 MW of new battery storage capacity in its second energy storage tender. The 11 winning projects range in size from 8.875 MW/17.75 MWh to 49.9 MW/100 MWh.

How many companies have won government support for a battery project?

Seven companies have won government support for 11 standalone battery projects at Greece's second energy storage auction, where 300 MW was offered.

Which energy projects remained below the line?

Two offers remained below the line: Alasia's two projects of 36 MW each and R1 Energy's planned unit of 50 MW. CNI's bid for a facility in Livadia was the lowest: EUR 44,100 per MW per year. The highest, at EUR 49,917 per MW per year, was for Terna's battery array in Thebes. The average was EUR 47,680 per MW per year.

How much does a GW energy storage auction cost?

This second auction comes after the initial round of auctions in August 2023, when 12 projects totaling 411 MW were awarded at an average annual cost of EUR 49,748 per MW. Another round is planned for April 2025, with the goal of allocating an additional 300 MW. These tenders are part of the country's 1 GW energy storage auction program.

Currently there is a growing interest for investments in storage facilities in Greece. Licensed projects mostly consist of Li-ion battery energy storage systems (BESS), either stand-alone or integrated in ...

The Greek authorities have awarded 300 MW of new battery storage capacity in its second energy storage tender. The 11 winning projects range in size from 8.875 MW/17.75 MWh to ...

Trina Storage, the energy storage arm of Trinasolar, has signed its first energy storage project in Greece with PPC Renewables, marking a major milestone for the company's expansion ...

Greece's Battery Storage to Aid Solar Integration by Mid-2026 Greece is harnessing its abundant sunshine to power a green energy transition, but the full potential of its solar capacity can ...

What are the 11 energy storage projects in Greece

Seven companies have won support for 11 standalone battery projects at Greece's second energy storage auction.

This changing scenario offers utility-scale battery storage and grid-balancing infrastructure investors in one of Europe's most dynamic energy markets compelling prospects. Greece approved ...

Proposals for two pumped storage hydropower plants next to each other in northern Greece received the environmental conditions. The Flampouro project is for 450 MW in both modes ...

Battery Energy Storage Systems (BESS) in Greece are transitioning from early-stage pilots to critical infrastructure, driven by a rapidly maturing regulatory framework and increasing ...

FAQs about Completion time of Greek energy storage projects Is Greece preparing for a new energy storage auction? Greece is gearing up for its second competitive auction for standalone, front-of-the ...

Greece is entering a new phase in its clean energy transition. After years of leading southern Europe in solar power expansion, the country is now shifting its focus to energy storage, a ...
