INDEPENDENT definition: not influenced or controlled by others in matters of opinion, conduct, etc.; thinking or acting for oneself. See examples of independent used in a sentence.

free, independent, sovereign, autonomous mean not subject to the rule or control of another. free stresses the complete absence of external rule and the full right to make all of one"s own decisions.

This article establishes a full life cycle cost and benefit model for independent energy storage power stations based on relevant policies, current status of the power system, and trading ...

An independent storage system intervenes to store excess energy produced by the sun and then releases the energy when it is most needed, thus ensuring a continuous supply of electricity.

An off-grid photovoltaic system, also known as an off-grid system or island system, is a form of power supply that operates completely independently of the public grid.

The comprehensive value evaluation of independent energy storage power station participation in auxiliary services is mainly reflected in the calculation of cos

This is a list of energy storage power plants worldwide, other than pumped hydro storage. Many individual energy storage plants augment electrical grids by capturing excess electrical energy during periods of low demand and storing it in other forms until needed on an electrical grid. The energy is later converted back to its electrical form and returned to the grid as needed.
