-----  
How do I choose the best solar generators?

To pick the best solar generators, we tested some of these power stations for charging capacity, ease of use, weight, and different use cases. Some picks were reviewed by Popular Mechanics test editor Brad Ford, who provided input for the larger-capacity units.

What makes a good solar generator?

Solar generators need to keep the power coming in and going out. The best solar generators can simultaneously charge all your intended devices via whatever plugs are necessary. Any portable power station worth your money will have a high output capacity so you can charge many devices, even if they require a lot of juice.

What is the best solar generator?

The Jackery Solar Generator 1000 v2 with 200W Solar Panel is our overall best solar generator pick for its durable, long-lasting battery capacity. It has great portability and can charge a phone 74 times and a laptop 14 times on a single charge, making it an ideal machine for staying connected and safe during emergencies or camping weekends.

How much does a solar generator cost?

Adding more to the generator's overall value, the accompanying solar panel has up to 22% solar-conversion efficiency and is compatible with most power stations and portable solar generators. Priced at under \$300, the power station and its 299Wh LiFePO4 battery pack offer up to 3,500 charge and discharge cycles.

The best solar generators are quiet, green solutions to powering up during power outages. See our top picks after extensive testing.

We rated and reviewed the best solar-powered generators for home backup during power outages, including models from Generac, Jackery, and more.
