A growing wave of concern has emerged in the United States after American cybersecurity experts discovered hidden cellular communication components embedded in Chinese-made solar ...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication ...

For months, experts examining renewable energy equipment imported from China have been quietly finding rogue components in solar inverters and large batteries, two people familiar with the...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected ...

Experts have uncovered secret communication devices hidden in Chinese-made solar power inverters, raising serious alarms about potential sabotage of U.S. infrastructure in the event of ...

In November, solar power inverters in the U.S. and elsewhere were disabled from China, highlighting the risk of foreign influence over local electricity supplies and causing concern among...

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar inverters, creating unprecedented vulnerabilities in global power grids.

LONDON, May 14 (Reuters) - U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained...

Every solar panel and battery connected to the U.S. energy grid relies on a device few people ever consider:

What is the grid connection of china s solar-powered communication cabinet inverter

the power inverter. In May of 2025, U.S. experts found undocumented ...

Often described as the "brain" of solar systems, these devices manage power output and grid communication. U.S. officials found communication modules in some Chinese-made inverters ...
