What is a smart battery swap cabinet?

The smart battery swap cabinet aims to solve the slow charging and charging safety problems of low-speed electric vehicle batteries, and solve the transportation capacity problem for high-frequency users of electric vehicles such as food delivery drivers.

How do I find the battery compartment on my smart lock?

Find the battery compartment on your smart lock. Depending on the lock model, the battery compartment could be at the front or back of the lock. Use the smart lock manual to help locate the compartment if needed. Carefully remove the old batteries from the compartment. Make sure to dispose of them properly according to your local regulations.

How do I install new batteries?

Take the new batteries and insert them into the battery compartment according to the polarity indicators. Ensure that you align the + and - signs correctly. Once inserted, close the battery compartment securely. After inserting the new batteries, test the smart lock to ensure it functions correctly.

How do I change the battery on my smart lock?

To change the battery on your smart lock, you'll need to follow specific steps provided by the lock's manufacturer. Typically, this involves accessing the battery compartment, removing the old batteries, and inserting new ones according to the correct polarity.
