What is a mega solar project?

Industry experts generally consider solar installations exceeding 1,000 MW (1 GW) capacity as mega solar projects. These installations typically feature: Based on the latest 2025 data, here are the world's largest operational solar farms ranked by their installed capacity: 1. Gonghe Talatan Solar Park - China (15,600 MW)

Where is Gonghe photovoltaic project located?

The Gonghe Photovoltaic Project is a 3,182 MW solar PV power project located in Qinghai, China. Post completion of construction, the project was commissioned in 2020. The project was developed by Huanghe Hydropower Development. Huanghe Hydropower Development owns the project. Buy the profile here. 2.

Kubuqi 2 Solar PV Park

Who owns China's mega solar projects?

This installation showcases China's collaborative approach to mega solar development, with 3 GW owned by China Energy Group and 1 GW owned by Inner Mongolia Energy Group. 7. Gelmud East Solar Park - China (3,534 MW) 8. Delingha Solar Park - China (3,350 MW) 9. Nilka County PV Park - China (3,000 MW)

What is a solar project phase?

A solar project phase is generally defined as a group of one or more solar units that are installed under one permit, one power purchase agreement, and typically come online at the same time. Each solar farm included in the tracker is linked to a wiki page on the GEM wiki. The most recent release of this data was in February 2025.

A solar power project in the Gobi Desert has moved the needle on the size and scope of global photovoltaic installations, aided by innovation in equipment and construction. The numbers tell ...

Discover the world's biggest operational solar farms and the mega projects set to reshape tomorrow's renewable energy landscape.

Of the total global solar PV capacity, 40.73% is in China. Listed below are the five largest active solar PV power plants by capacity in China, according to GlobalData's power plants database. ...

Where is the solar power generation project

Countries worldwide, including Germany, Spain, China, the United States, and others, are rapidly expanding their solar power infrastructure. China has been a particularly prominent ...

The project Na is working on is the first phase of the Kubuqi Desert Ordos Central-Northern New Energy Base. As one of China's first large-scale renewable energy bases with a ...

CHN Energy's 1-gigawatt offshore photovoltaic (PV) project in Kenli District, east China's Shandong Province, successfully connected its first batch of PV units to the grid on Wednesday. The ...

Discover the world's largest solar farms in 2025. Complete rankings, capacity data, locations, and analysis of mega solar projects transforming global energy.

The first phase of the Huaneng Nagu Photovoltaic Power Station, the world's highest solar power project, was officially linked to the state grid in Deqen Tibetan Autonomous Prefecture in ...

XINING, June 9 -- Amid China's green energy revolution, the world's largest solar photovoltaic power plant on the Qinghai-Xizang Plateau is forging a unique development path, ...

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated distributed (<1 ...
