Discover the 5 biggest solar power plants in the world (2025). Learn their capacity, country, and role in shaping global renewable energy.

Explore the 5 Largest solar power plants from around the world. From systems in China, India and the United States.

Data and information about power plants and their location across the globe, plotted on an Interactive world map

Find a list of solar photovoltaic plants that are currently considered the largest on the globe. We have listed the ground-mounted utility-scale stations, which have already been connected to the power ...

Solar power has grown rapidly over the last decade, and so have solar plants. This map shows the world's 15 largest solar power plants.

The largest solar power plant in the world is the Bhadla Solar Park, which was completed in 2020. This solar thermal power plant is located in Bhadla in the Jodhpur district of Rajasthan, India.

We've looked at the 15 biggest solar farms in the world right now, examining capacity, total investment, and the future of solar power worldwide.

The following is a list of photovoltaic power stations that are larger than 500 megawatts (MW) in current net capacity. Most are individual photovoltaic power stations, but some are groups of co-located plants owned by different independent power producers and with separate transformer connections to the grid. Wiki-Solar reports total global capacity of utility-scale photovoltaic plants to be some 96 GWAC which generated 1....
