Production meters and net meters are rarely going to match as they track different things at different places. A production meter should track every kWh of energy produced by your system, ...

This guide explains the most common reasons why your solar panels may not be generating power, and how to troubleshoot both rooftop systems and portable solar generators used ...

Your solar system might be producing exactly as expected--or even better--but utility bills don't show solar production. They only show how much energy you drew from the grid after ...

Within a few months, the POCO swapped it out for a smart meter that I assume has the capability of being read remotely. Not sure why the POCO would go to the trouble if they weren't ...

Why Your Solar Generation and Utility Meter Don't Match. Your solar app or panel typically displays the total amount of electricity your system generates. Your utility meter records the net amount of ...

The confusion stems from a simple fact: your solar monitoring system and your utility meter are measuring completely different things. Let's clear up the confusion once and for all.

Most solar owners stare at their meters feeling completely lost, wondering if those blinking lights and scrolling numbers mean success or system failure.

Discover why your solar panels are underperforming and how to fix it. Expert troubleshooting guide with step-by-step solutions, safety tips, and cost estimates.

Confused why your solar app and utility bill don't match? Learn the difference between total production and net metering, and how your home consumes energy.

Why doesn't the solar meter generate electricity

One of the most common complaints we hear from homeowners is that their electricity bills are still high because their new solar panels are not producing enough power. Here's what to do ...
